

# G Series – Model Servo Motor

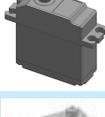

Updated date: 2024-11-20

GDC Product model	GDC Product name	Signal type	Motor type	Stall torque (Kgf. cm)	Turning speed (S/60°)	Rated voltage (V DC) ±0.2V	Range of operating angles	Sensor type	Housing material	Gear material	Output tooth type	Product Dimensions (LxWxH/mm)	Cable type	Features:	Common application scenarios
<b>5-wire servos</b>															
CG090A-OTAB11-01	9 g servo - five lines	not	Core motor	≥2.1	≤0.12	5.0	180°	potentiometer	plastics	plastics	ø4-21T	22.30x12.40x28.50	MX1.25/5PIN	There is no built-in control panel	It is used for the main control with its own driver
CG090B-OTAB11-01	9 g servo - five lines	not	Core motor	≥2.4	≤0.12	5.0	180°	potentiometer	plastics	plastics	ø4-21T	22.30x12.40x28.50	MX1.25/5PIN	There is no built-in control panel	It is used for the main control with its own driver
CG370A-OTAB11-01	37 g servo - five lines	not	Core motor	≥6.8	≤0.22	5.0	180°	potentiometer	plastics	plastics	ø6-25T	40.85x20.15x39.15	5PIN	There is no built-in control panel	It is used for the main control with its own driver
CG037A-OK1B11-01	3.7 g servo - five lines	not	Core motor	≥0.8	≤0.09	3.7	180°	potentiometer	plastics	plastics	ø4-28T	20.56x8.88x20.32	MX1.25/5PIN	There is no built-in control panel	It is used for the main control with its own driver
CG020A-OK1B11-01	2.0g servo - five wires	not	Core motor	≥0.40		3.7	180°	potentiometer	plastics	plastics	ø4-28T	16.45x8.86x17.00	MX1.25/5PIN	There is no built-in control panel	It is used for the main control with its own driver
CG170A-OTAB11-01	17 g servo - five lines	not	Core motor	≥5.0		5.0	180°	potentiometer	plastics	plastics	ø6-25T	28.60x13.00x31.00	MX1.25/5PIN	There is no built-in control panel	It is used for the main control with its own driver
CG251A-OTAB11-01	25 g servo - five lines	not	Core motor	≥7.5		5.0	180°	potentiometer	plastics	plastics	ø6-25T	36.00x15.20x29.50	MX1.25/5PIN	There is no built-in control panel	It is used for the main control with its own driver
<b>360 degree motor rotation</b>															
CG090A-PTA011-01	9 g motor	PWM	Core motor	≥2.1	125±10%	5.0	无角度	not	plastics	plastics	ø4-21T	22.30x12.40x28.50	JR/2.54	No angular speed control, can always forward and reverse and stop	Wheels, runners, drawstrings
CG090A-PTA014-01	9 g motor	PWM	Core motor	≥3.2	118±10%	5.0	无角度	not	plastics	Plastics + powder metallurgy	ø4-21T	22.30x12.40x28.50	JR/2.54	No angular speed control, can always forward and reverse and stop	Wheels, runners, drawstrings
CG370A-PTA011-01	37 g motor	PWM	Core motor	≥6.8	≤0.22	5.0	无角度	not	plastics	plastics	ø6-25T	40.85x20.15x39.15	JR/2.54	No angular speed control, can always forward and reverse and stop	Wheels, runners, drawstrings
<b>Conventional servos</b>															
CG090A-PTAB11-01	9 grams of servos	PWM	Core motor	≥2.1	≤0.11	5.0	180°	potentiometer	plastics	plastics	ø4-21T	22.30x12.40x28.50	JR/2.54	180 degree inner angle control	Model airplanes, model cars, robots, building blocks education, etc
CG090A-PTAB11-02	9 grams of servos	PWM	Core motor	≥2.1	≤0.11	5.0	180°	potentiometer	plastics	plastics	ø4-21T	22.30x12.40x28.50	JST/MX1.25	180 degree inner angle control	Model airplanes, model cars, robots, building blocks education, etc

1、Methods of communication: Communication interface		
1-1	Type of communication: Communication type	PWM
1-2	Communication parameters: Communication parameter	PWM : Pulse duration(500us-2500us)、cycle(3ms-25ms) PWM signal dead zone: 5us
2、Features: Functional characteristics		
2-1	Mode of operation: Operation mode	Servo mode
2-2	Rotation definition: Rotation definition	PWM(500→2500)=angle(-90 → 90° ) Counterclockwise (CCW) : (-90° → 90° , Overhead output shaft)
1、Methods of communication: Communication interface		
1-1	Type of communication: Communication type	Serial+PWM
1-2	Communication parameters: Communication parameter	PWM : Pulse duration(500us-2500us)、cycle(3ms-25ms) PWM signal dead zone: 5us(modifiable) Serial Protocol: "Gao Decheng General
2、Features: Functional characteristics		
2-1	Mode of operation: Operation mode	Servo mode
2-2	Rotation definition: Rotation definition	PWM(500→2500)=angle(-90 → 90°) directives(-900→900)=angle(-90 → 90°) Counterclockwise (CCW) : (-90°→ 90° , Overhead output shaft)
1、Methods of communication: Communication interface		
1-1	Type of communication: Communication type	Serial+PWM+SBUS
1-2	Communication parameters: Communication parameter	PWM : Pulse duration(500us-2500us)、cycle(3ms-25ms) PWM signal dead zone: 5us(modifiable) Serial Protocol: "Gao Decheng General Agreement"
2、Features: Functional characteristics		
2-1	Mode of operation: Operation mode	Servo mode
2-2	Rotation definition: Rotation definition	PWM(500→2500)=SBUS(0→2048)=angle(-90 → 90°) directives(-900→900)=angle(-90 → 90°) Counterclockwise (CCW) :(-90° → 90° , looking down on the output shaft)
1、Methods of communication: Communication interface		
1-1	Type of communication: Communication type	RS485
1-2	Communication parameters: Communication parameter	Serial Protocol: "Lead-Sum General Agreement", "Strike-Sum Modbus Protocol"
2、Features: Functional characteristics		
2-1	Mode of operation: Operation mode	Servo mode
2-2	Rotation definition: Rotation definition	Command(-900→900)=angle(-90 → 90° ) Counterclockwise (CCW) :(-90° → 90° , looking down on the output shaft)
1、Methods of communication: Communication interface		
1-1	Type of communication: Communication type	CAN2.0
1-2	Communication parameters: Communication parameter	CAN Protocol: "Terde Cheng CANopen Protocol"
2、Features: Functional characteristics		
2-1	Mode of operation: Operation mode	Servo mode
2-2	Rotation definition: Rotation definition	Command(-900→900)=angle(-90 → 90° ) Counterclockwise (CCW) :(-90° → 90° , looking down on the output shaft)

# T series – high torque servo motor
